

# AIRplus® Wrap Film – Flexible Wrapping and Optimum Protection

# You send your product on a journey – we provide the perfect product protection with our AIRplus® Wrap film

Your products can experience a variety of hazards while being transported. For example, they may be exposed to knocks, scratches, or damage, or may be dropped. Our AIRplus® Wrap film can be used to wrap your fragile and delicate products even more tightly to protect them thanks to its innovative wavelike structure. Another advantage is its on-demand production, with the packer creating the air cushions according to their needs right there at the packing station. AIRplus® Wrap film is therefore a space-saving alternative to conventional air bubble film.
