

Product specifications

Papercooler

The Papercooler is a sustainable alternative to the EPS cooler. Because of the unique patented* paper insulation system, the Papercooler provides a similar insulating and protective performance compared to the EPS box. It is the first shipping packaging solution of its kind that delivers this performance and hence a huge sustainable step forward.

Elements

1. Outer box FEFCO 0201
2. Isolation panel A Top & bottom (2x)
3. Isolation panel B Side (2x)

Available sizes: Extra Small, Small, Medium and Large.

Outer Dimensions (mm)

Size	L	W	H

Small	295	195	288
Medium	395	295	288
Large	595	395	350

Inner Dimensions (mm)

Size	L	W	H
Extra Small	247	150	92
Small	247	150	230
Medium	323	226	205
Large	503	303	263

Materials

Outer box

84% recycled cardboard

Isolation panels

66% recycled cardboard

Cushion pads

Paper sheets

Why using the papercooler

- Entirely recyclable
- Biodegradable
- No separate EPS return flow
- Meets the requirements for conditioned transport while maintaining product quality
- Less transport and storage volume
- Flexible in customization
- Wide range of printing options

Recycle instructions

- The Papercooler is made from (recycled) paper and cardboard
- The entire packaging is 100% recyclable
- Fully recyclable with the paper recycling stream
